

You?

Do you experience sudden flushes when exposed to extreme temperatures or feeling emotional?

Have you noticed the persistent presence of small dilated blood vessels on your face?

Does it look like you have a permanent sunburn?

Is your skin abnormally red after a hot shower or exercise?

Do you tend to blush easily after a glass of wine or spicy foods?

Are your eyes gritty and bloodshot even after a good night sleep?

If you have answered YES to at least one of these questions,
your skin is vaso-reactive.

Rosacea, couperose, erythrosis, diffused redness

Redness, a matter of degree

DIFFUSED REDNESS of the skin, across the cheeks and the nose, is among the temporary manifestations that translate into an excessive reaction to ordinary situations such as sudden changes in temperature, alcohol or spicy food consumption. Over time, these may progress to erythrosis then couperose.

We speak of **ERYTHROSIS** when there is permanent dilatation of blood vessels on the face, especially across the cheeks and the nose.

As to **COUPEROSE**, some vessels are more dilated than others and are clearly visible over a background of erythrosis. 15 % of the population is affected by this skin condition that may lead to rosacea.

Finally, **ROSACEA**, a chronic skin disorder, is the most severe manifestation of a vaso-reactive skin. It is characterized by 3 main clinical signs located on the central area of the face:

- Visible micro-vessels
- Redness sometimes with edema in the form of flushes or permanent redness
- Eruption of small pimples

**ROSACEA
IS COMMON ENOUGH
SINCE OVER
45 MILLION PEOPLE
WORLDWIDE SUFFER FROM
IT - 13 MILLIONS IN NORTH
AMERICA OF WHICH
2 MILLIONS ARE
CANADIANS.**

The Rosa-C³ Solution

Used regularly by men and women affected by rosacea or with vaso-reactive skin,

the Rosa-C³ Treatments

- significantly reduce redness in intensity and size,
- diminish the number and size of visible micro-vessels,
- attenuate burning sensations and tightness,
- instantly soothe irritation and frequent sensations of warmth,
- provide immediate comfort and relief
- and prevent typical signs of these skin types from getting worse day after day.

SCIENTIFIC
INNOVATION

The Rosa-C³ skin care treatments contain the **CELL CONTROL COMPLEX**, a Laboratoire Dr Renaud exclusivity, consisting of a unique cocktail of exceptional ingredients. With no less than 21 active ingredients of vegetal or biotechnological origin, the **Cell Control Complex** mostly:

- reduces inflammation significantly, decongests, soothes and calms,
- protects vessels and boosts the micro-circulation,
- prevents the progression of the typical signs of vaso-reactive skin.

For the Rosa-C³ cure to be successful, it's important to observe your aesthetician's personalized instructions.

Rosacea or vaso-reactive skin

The Laboratoire Dr Renaud Solution in two steps

PROFESSIONAL TREATMENT AT
THE INSTITUTE

1

SOS Serum Anti-stress Concentrate

- Immediate “Soother”
- Decreases redness significantly in intensity and size
- Restores comfort and well-being and reduces cutaneous reactivity
- Improves the micro-circulation and micro-vessels resistance
- Non-comedogenic

An objective clinical study conducted by an independent laboratory on volunteers affected by ROSACEA, COUPEROSE, ERYTHROSIS or DIFFUSED REDNESS, shows the efficacy of the Rosa-C³ cure. The cure consists of the twice-a-day home use of the SOS Serum and the 24H Emulsion Control for 56 days combined with the Rosa-C³ Professional Treatment at the rate of 1 treatment per week for 4 consecutive weeks.

24H Emulsion Control Soothing Treatment Cream

- Reduces redness and its progression
- Provides comfort and well-being
- Decreases the appearance of micro-vessels, reinforces and protects the micro-circulation
- Increases the skin’s defence system
- Non-comedogenic

2

HOME CARE TREATMENT

UV-Science SPF 30 Daily High Protection

Protecting, Anti-Ageing Sunblock Cream

- Limits the size of lesions and prevents them from getting worse for vaso-reactive skin or skin affected by rosacea
- Protects from the effects of photo-induced, premature ageing
- Adapted to all skin types for daily use
- Non-comedogenic

Renowned for its capacity to offer innovative skin care and exemplary customer service, Laboratoire Dr Renaud has been a leader in cosmetology for more than sixty years.
